

Denver Water Winter Surcharge

Impacts to Single Family Residential Bills

A surcharge of \$.25 will be added for consumption more than 7,000 gallons, but less than 22,000 gallons. The surcharge will increase to \$.50 per 1,000 gallons at 22,000 gallons of consumption and \$.75 at 60,000 gallons.

Winter Thresholds for other Customer Classes

	In Thousands of Gallons				
	Residential	Duplex	3-Plex	4-Plex	5-Plex
Increasing Charge					
\$0.25	7-22	12-30	17-42	22-54	27-66
\$0.50	22-60	30-80	42-103	54-136	66-200
\$0.75	>60	>80	>103	>136	>200

All Other Class

For "All Other" customers the threshold is based on a comparison to their water consumption during the same period in 2001. Customers who use 30% less water than last year will not be subject to a surcharge. An increasing surcharge is imposed on consumption of more than 70% (\$.50 per 1,000 gallons) and more than 100% (\$.75 per 1,000 gallons) of last year's levels.

Master Meter Districts

\$.50 per 1,000 gallons surcharge after individually set minimums*

*Minimum consumption will be calculated by multiplying a District's residential tap equivalents (3/4 inch) by the minimum use afforded to single family residential customers (3,500 gallons) and will be charged the normal Master Meter rate.

1. "All Other" class includes: Commercial, Industrial, Government and Multifamily with 6 units or more
